

ESSENTIALS OF PASSION

Touché Ice®

In the box:

- 1 x Ice holder
- 1 x Ice grip
- 1 x Bullet vibrator (batteries included)
- 1 x Quick start manual

Quick Start:

- 1 Take the ice holder and completely fill it with water.
- 2 Make sure the bullet vibrator is removed from the grip.
- 3 Gently place the grip on top of the water until it seals the ice holder.
- 4 Place the Touché Ice® in a freezer.
- 5 Wait for the water to freeze. This can take up to 4 hours, depending on your freezer.
- 6 Take the Touché Ice® out of the freezer. Place the vibrating bullet in the ice grip. Carefully remove the ice holder from the ice by pulling the tab gently... and enjoy!

Tips & Tricks:

- To get ice that is nicely transparant you can use boiled water. Remember this extends the time that the Touché Ice® has to stay in the freezer.
- Taste the difference with Touché Ice® additional flavour packages, available in: Pineapple, Orange, Apple, Lemon, Strawberry. Available at your Touché Ice dealer.
- Create your own Touché® Chocolate. Gently melt some chocolate in a pan. Pour it into the ice holder and place that in your fridge. When solid, you can start your delicious fun!
- Be creative; make up your own ideas and send them to:
ice@touchyourpassion.com

Features

- Shaft Height 10 cm
- Shaft Diameter 4,7 cm
- Replacable vibrating bullet
- 64 pieces in one big box

Phthalate free

Our intention was to develop products that not only have the looks and performance expected of great erotic toys, but which would also be reliable and above all safe. All this while being a particularly welcome addition to your -and your partner's- love-life.

Importantly we accepted that years of experience designing and manufacturing adult toys was not enough; we went back to fundamentals when creating the Touché range.

We listened to our customers and responded to their ideas, passions and fantasies in the development of our toys. Careful choices were made about using the best materials -Touché use medical-grade silicones- while not compromising on the power or controllability of their functions.

Creating a range where products compliment each other, our designers proudly succeeded in their brief; to produce a selection of brand-new toys, each offering tantalising possibilities for erotic experiences.

Of course we want to tell you much more about our beautiful products; Touché!

You, the customer, are our VIP. Your health is our number one priority; this is why all our products are 100% phthalate-free. We don't compromise on your safety. To maintain our high standards, all Touché products are independently tested in the world's leading testing laboratory.

We're confident you'll enjoy the 'Essentials of Passion' when using our Touché products. Passion really is one of the most beautiful gifts!

WARRANTY

All Touché vibrators are made from top quality materials and manufactured to the highest standards. As we want you to enjoy our beautiful products with peace-of-mind, we give a 1 year warranty on all our adult toys. The warranty covers problems with the motor and tearing of silicone due to material or manufacturing errors. It does not cover neglect or misuse of the product.

SILICONES

Touché vibrators are manufactured from ultra-high grade silicone. The superior surface finish of silicone makes Touché vibrators an excellent choice for those who appreciate their life-like feel. Silicone has a lot of advantages, including:

- Rapidly reaches body temperature and retains heat for longer.
- A silky finish with long lasting durability and enjoyable firmness.
- Silicones are odourless, tasteless, non-porous, and hypoallergenic.

PHTHALATES

Phthalates are chemicals which are used to make hard plastics softer and more flexible. As you probably know, there is a lot of negative publicity around phthalates and their use in other people's adult toys. The silicones we use are already so flexible that they transmit the most gentle of vibrations, as well as the strongest! Our toys are manufactured with absolutely no phthalates; our high quality silicone simply makes their use unnecessary.

MOTOR

Our factory has developed a brand new ultra sonic motor. Because of the advanced ultra sonic design you can feel the vibrations all over the toy and not only where the motor is located. These new patented motors are splash proof, and can be used in the shower.

To turn the vibrator on or off, just press the control button.

All our bullet motors have 1 speed, all our other motors have 5 to 10 speed modes with climax functions and you can quickly and easily stop the motor during use.

SAFETY

The silicone we use for Touché adult toys is also used for medical purposes and tested by one of world's leading laboratories.

Every country has different product laws, so all our adult toys are tested and approved for each country individually. It doesn't matter where you live, America, Europe, Australia, Touché is approved for use under the laws of your country or territory.

Touché is the only adult toy supplier in the world to make their test reports publicly accessible, via our website: www.touchyourpassion.com

ENVIRONMENT

Some batteries may be disposed of in common household rubbish. Others should be disposed of via an approved environmentally-sound route. Others may be suitable for recycling. Please check your battery packaging for specific instructions.

Touché packaging materials are recyclable and can be reused. If you wish to dispose of the packaging, separate the various materials and take them to a designated recycling facility.

LUBRICANT & TOYCLEANER

Touché silicones are so smooth that you won't normally need a lubricant for vaginal use. If you wish to use a lubricant we suggest you use Touché Lubricant. Water based lubricants such as Touché Lubricant are intended for internal use and are ideally suited for contact with intimate mucous membranes. Our lubricant is dermatological tested, perfume-free, and odourless. It's also latex and condom safe and are developed for regular use. If you want to clean your toy with a toy cleaner we advise you use a moist cleaning towel with a NON alcoholic base. Suitable cleaning towels are gentle and hygienic and are intended for cleaning intimate areas or products. Touché Toycleaner is suitable for sensitive skin and mucous membranes. It also uses a non-alcoholic base and is safe for latex, silicones and other types of rubber.

SAFETY ADVISE

- Sexual diseases can be transmitted by adult toys.
- Don't share your vibrator with other people.
- This product shouldn't be used by pregnant or menstruating women, or anyone with a medical condition it could adversely affect without consulting a doctor prior to use.

EXTRAS

We won't let you down - you bought a Touché product. Trust in our adult toy expertise and experience!

For information on new designs, buying other products, toy warranty, accessories or anything else Touché, stay informed via our website: www.touchyourpassion.com

FINALLY

One last thing to keep in mind before venturing into the erotic pleasures which a Touché adult toy offers; hygiene.

If you are sharing your vibrator with a partner (or two!), ensuring that your toy is clean is vital for a safe fun. This is especially the case when using it for alternate vaginal and anal contact or penetration as harmful bacteria can be easily transferred this way. Please ensure that your vibrator is properly cleaned.

We hope that by choosing this top quality product from Touché your passion is as safe as it is guaranteed. If you want to tell us anything, or if you have a suggestion, please send an e-mail to safety@touchyourpassion.com

We are always open to your comments.

Touch your passion and enjoy!
